1. **What I gained from the Industrial Talk and Industrial Visit**

   During the industrial talk, I learned about the ICT Services, Infrastructure, Network, Security, Information System and System Development at UTM Digital. These topics were presented by Aslinda Aris, Ts. Mohammed Mohd Hasni, Mohd Hamri Yusuf, Khairul Nizam Md Razali, Noor Haslan Sallehudin and Helmee Yaacob.

   On the other hand, during the industrial visit, I took a glimpse into the work environment of UTM Digital employees. For example, I visited the Lobby, Open Office, Data Centre, TM Room and UTM Digital Care.

2. **Suggestions**

   Including a guide to becoming an employee at UTM Digital would be advantageous. For example, the guide could include essential information such as prerequisites and qualifications. They could also provide tips and strategies to enhance one's candidacy.

   Other than that, providing networking opportunities during the talk would be beneficial. For example, UTM Digital could arrange networking sessions, allowing the students to engage with the speakers and other employees. Such interactions could cultivate an atmosphere conducive to mentorship and the exchange of expertise and experiences

3. **Others**

   In conclusion, I gained a lot of information, insights and motivation. This allowed me to understand the course material better. Particularly, by bridging the gap between theoretical knowledge and practical applications of technology. I have also been inspired to work diligently and become an appealing candidate to potential employers such as UTM Digital.
